

REMARKS

Claims 1-51 are cancelled. Claims 52-80 are added and are all of the claims in the application.

The specification and drawings are amended in the same manner deemed acceptable in the parent application. Entry of these amendments is requested.

Claims 52-80 are the same as allowed claims 1-8, 17-22 and 52-65, respectively, in the immediate parent application, but remove reference to processing relative to a reactor. The claims as herein presented are supported by the original disclosure, as the flow relative to the reactor also inherently constitutes flow relative to the substrate. Accordingly, no new matter is added.

This application is believed to be in immediate condition for allowance, and action to that end is requested.

Respectfully submitted,

Dated: 1-30-04
